35 - What two things would you change about this course?

Response Rate	10/11 (90.91%)

• I would change the amount of class work we have to complete every week.

• The workload. It was tedious and unnecessary.

• The assignment checklist was hard to read and too wordy. It often confused me and my classmates. I also thought the course load was too much for a one credit class.

• The work load is EXTREMELY heavy. There are so many things to do it actually takes longer than the required coursework time for a one credit class. In addition, there are so many assignments "due" but typically only two assignments per week is under the assignments tab so it is hard to understand what is truly due and what will be graded. For example, you want us to complete reflections etc but that is not under the assignments tab. Makes it hard to keep track of what is expected of us

• work is tedious, and does not stimulate critical thinking. I don't believe in providing critical feedback to my peers.

• - The workload and time needed for this course when it is only worth 1 credit. - the focus on learning about as many technologies as possible instead of really learning about specific ones more in depth

• reduce the workload

• I would change when certain things were taught. There was asynchronous assignments that i struggled with and thought they should have been done in class and then there were synchronous assignments that I felt was a waste of class time. I think the instructor needs to do a better job on listening to her students, there were times where she would just flat out ignore us and our questions

• The amount of work

• I loved the amount of online tools we learned about and I enjoyed being able to start my own teaching website

---

36 - What two things would you recommend keeping in this course?

Response Rate	8/11 (72.73%)

• The design cases and microteaching

• I liked using the website as our portfolio.

• - website - design cases

• exploration of activities (should have free choice)

• - the mini lesson - the lesson plan idea write up

• I think the resources were good because it will be helpful for my future classes

• The websites Some activities

• the microteaching video and the tech integration papers
