Part 7: What would you change about this course and why? (IDE401 M002 F20)

N/A

I think this course is great! However, I do think the workload is too much for just a 1 credit class.

I would change the work load at times considering half of the course was asynchronous and that it is counting for only 1 credit. At times I felt that the work load was a lot and should be more than just a 1 credit class. But overall, this was a great course!

There is nothing that I would change about this course. Job well done!

nothing, but more in-person instruction.

Part 8: What would you recommend keeping in this course and why? (IDE401 M002 F20)

Keep everything! I thoroughly enjoyed this course as well as the instructor! Very informative and interesting to be a part of and learn from!

I think the strategies taught were so cool and are going to be so helpful in my future classrooms!

I think that the most interesting lesson so far was the one about using technology as an accommodation for some students!

very useful resources and provided multiple ways to incorporate technology into the classroom!

The implementation of the WIX website as I believe it is useful for teachers and any profession.

The reflections at the end of each class

the flow of design because the activities are extremely helpful for my final project
