| 35 - What two things would you change about this course?	
Response Rate	9/11 (81.82%)

• The work that is not at all relevant to any other major content. Please never make this course asynchronous, not even for a week.

• I would focus less on types of websites because we are all pretty tech savvy and more on actual technology teachers use like promethium/smart boards, smart notebooks, document cameras and other technologies practicing teachers use every day.

• More work done in class that we were supposed to be doing. Work that helps us learn more for the classroom.

• less work load

• I would recommend changing the time of the class.

• I would have the course be earlier in the day.

• have us learn about smart boards and the like for teaching. less work, for a one credit course it is a lot of work.

• Further clarification for the asynchronous class Adding even more technology activities for us to complete

• way too much work for a one credit course I spent way too much energy and frustration on this course I would not recommend it to anyone

36 - What two things would you recommend keeping in this course?	
Response Rate	9/11 (81.82%)

• Lesson plans, exploration stations

• I would recommend keeping the games unit and the assessment unit

• The interactive activities.

• micro teaching and google VR

• The micro-teaching and the online interaction with one another.

• I would recommend keeping the various technology tools because they were very engaging and I think younger students would love these tools!

• micro teaching

• I think the microteaching was helpful, as well as exploring all the different technology tools

• the teacher
